Allowed Claims

1. Claims 1-7 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The closest prior art of Kajiwara et al. (Pub. No: US 2002/0018597) provides for an image processing apparatus 1' with high performance, decodes predetermined entropy encoded data and encodes the decoded data by simple entropy coding (Golomb coding). The obtained encoded data is transferred (sent) from the image processing apparatus 1' to the image output apparatus 2' decoded the simple entropy encoded data in place of decoding predetermined entropy encoded data. See Fig.16, para.134. Kajiwara failed to teach or suggest for a load measurement unit to measure the load of the code sequence generation unit; a parameter generation unit to generate a parameter corresponding to the load; and a sending unit to send the another code sequence data; wherein the code sequence generation unit generates the another code sequence data by using the parameter such that the data amount of the another code sequence data to be sent per a unit time is adjusted according to the load.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
